What's in this month's issue?

Virtual and In-person Trainings Within the Learning Management System (LMS)
- VLR eLearning Flagger Certification
- Entry Level Driver Training (ELDT) - CDL
- VLR Game of Logging: Levels 1 & 2 (In-person)
- VLR Virtual Transportation Asset Management
- VLR Game of Logging: Storm Damage (In-person)
- VLR Virtual Safety Round Table: DigSafe
- VLR Virtual Pavement Condition Assessment
- VLR Virtual Technical Round Table: MRGP & Road Erosion Inventory App Updates
- VLR Pavement Surface Evaluation and Rating (PASER)
- Rivers & Roads Tier I
- Rivers & Roads Tier II
- Rivers & Roads Tier III
- TC3 (Transportation Curriculum Coordination Council)

Featured Webinar Recording
- Trench Safety

Tailgate Talks
- High Visibility Apparel
- N-95 Respirator Use

News & Resources for Municipalities
- Save the Date: Vermont Municipal Equipment Show & Field Day
- Municipal Roads General Permit Newsletter
- Managing Underground Safety Training (MUST)
- Distracted Driving Week | NHTSA
- Everything You Need for Distracted Driving Awareness Month
- National Work Zone Awareness Week
- Administrative Professionals Day
- 2022 National Public Works Week
- FHWA/Center for Local Aid Support: Training Opportunities
- Agency of Transportation - Better Roads Program
- VLCT Training & Events
- VTrans Show Me the Money Guide for Municipalities

Virtual and In-person Trainings Within the LMS

Before clicking on class links via LMS:
Be sure to have your LMS open, and be signed in for the links below to bring you to the proper class pages.

VLR eLearning Flagger Certification
We have completed an eLearning version of our Work Zone Flagger course. It meets the requirements established by the Manual on
Uniform Traffic Control Devices (MUTCD), the Occupational Safety and Health Administration, and Vermont standard requirements. This enables municipal employees to complete the course in our Learning Management System and receive a flagger certification card via mail.

The full course will take from 3-4 hours to complete. It has 4 modules each with a quiz at the end, after completing the 4 modules there are 4 drag and drop scenarios to demonstrate adequate understanding of work zone setup, and finally the exam at the end.

Roads Scholar Category - 4 Safety hours

CDL - Entry Level Driver Training - Theory Curriculum

FMCSA’s (Federal Motor Carrier Safety Association) Entry Level Driver Training (ELDT) regulations set the baseline for training requirements for entry-level drivers. This includes those applying to:

- Obtain a Class A or Class B CDL for the first time
- Upgrade an existing Class B CDL to a Class A CDL
- Obtain a school bus (S), passenger (P), or hazardous materials (H) endorsement for the first time

The ELDT program consists of a theory training which covers 5 main topics, 7 behind-the-wheel range skills, and 12 behind-the-wheel on-road skills. In order to successfully complete the theory portion of the training, participants must score an 80% or higher on the assessments for each section.

The theory portion of the ELDT is available to municipalities in our Learning Management System. If you have questions about this training please contact Todd Eaton by email or calling 802-353-0110.

Entry Level Driver Training Curriculum

Upon successful completion of the online theory portion of the training, drivers will understand:

1. Basic Operation
2. Safe Operating Procedures
3. Advanced Operating Procedures
4. Vehicle Systems
5. Non-Driving Activities

VLR Game of Logging - Levels 1 & 2

This 2-day workshop discusses:

- Safety/Emergency Planning
- 5 – Point Safety Check
- Felling/Demonstrations at nearby site
- Routine Chain Saw Maintenance

Items to bring:

- Hard Hat
- Long Pants
- Sturdy leather/work hiking boots
- Weather/work appropriate clothing
- Hearing/Eye protection & Chaps (if possible)
- Leather/chain saw gloves (optional)

April 5 & 6 - Westminster Firehouse, 103 Grout Avenue
In-person 7:30 a.m. - 4:00 p.m.

April 12 & 13 - St. Albans DPW, 942 Brigham Road
In-person 7:30 a.m. - 4:00 p.m.

REGISTER via VLR Website
REGISTER via LMS

Max 10 participants per day. Bring a bag lunch!
VLR Virtual Transportation Asset Management
Instructor Katie Zimmerman
Katie helps agencies determine their needs; better use asset data for planning, programming, budgeting, and investment decisions; and improve agency transparency and accountability. She works with agencies to address the data integration, business process, and capacity building support needed to develop asset management plans and to fully realize the benefits of asset management.

She led the development of Transportation Asset Management Plans (TAMPS) for the Kentucky Transportation Cabinet and the Minnesota, Nevada, Illinois, and Ohio Departments of Transportation (DOTs) and serves as an instructor for three National Highway Institute transportation asset management courses.

Transportation Asset Management (TAM) is a data-driven approach that helps agencies get the most bang for their buck, picking projects and treatments that keep roads in the best possible condition for as long as possible.

While TAM is a great fit for federal and state transportation agencies, developing a TAM program is a big effort for many local agencies. This training offers a simple overview of TAM’s components and illustrates how little changes can have a big impact on an agency.

Ultimately, the training outlines how agencies can:
- Take initial steps towards implementing TAM
- Get more out of available funding
- Better communicate with elected officials and residents

The training also introduces example road and street management processes and tools that benefit other local agencies.

Roads Scholar Category - 2 Technical hours

VLR Game of Logging - Storm Damage
This workshop will teach safe techniques for working with trees under extreme compression/tension or damage due to weather or other situations. Understanding the hazards that trees with attached root balls, tangled and/or split stems or other dangerous situations can present. Dismantling of these dangerous situations with various cutting techniques, using ropes and winches to manage different situations safely will be included in this training.

Prerequisite: Students must have completed Game Of Logging 1 & 2 prior to attending this Storm Damage Cleanup workshop.

Roads Scholar Category - 6 Equipment hours

VLR Virtual Safety Round Table
DigSafe
Instructor Lisa Powers
Lisa has worked at Dig Safe since 1989. In 1994 she stepped into her role in Public Relations. Lisa is responsible for Dig Safe’s public awareness campaign, educational material, website and newsletters, but her favorite part of the job is visiting companies and organizations to give an overview of the Dig Safe program and its requirements.

She can also be found at events and trade shows promoting Dig Safe throughout Dig Safe’s five New England states.

Lisa has been an active member of Public Relations Society of America since 1999.
Lisa will provide a complete overview of the following topics:

- Damage Prevention laws and rules for both facility operators and excavators
- Pre-marking techniques for proposed excavation sites
- Dig Safe notification procedures
- Methods for working safely around underground facilities
- Safety protocol if an underground facility is damaged
- Enforcement and regulation process by the appropriate state agency(ies)
- Potential hazards of utility damage, lessons learned
- Question and Answer; group discussion

Roads Scholar Category - 1 Safety hour

VLR Virtual Pavement Condition Assessment

Instructor Greg Duncan

Greg Duncan is a Senior Engineer at Applied Pavement Technology, Inc., with more than 29 years of pavement materials, construction, and roadway maintenance engineering experience. Greg is a certified National Highway Institute instructor and regularly teaches pavement preservation and maintenance courses for state and local agencies. He regularly works on national and state projects dealing with preventive maintenance treatments.

Agencies need to know what they have and its condition in order to make informed project and treatment decisions.

This 2-hour virtual training provides guidelines for conducting asphalt pavement condition surveys based on the Pavement Surface Evaluation and Rating (PASER) methodology. PASER uses a single value to represent overall pavement condition. It is intended to be a consistent, objective, and repeatable pavement evaluation tool.

The training also helps agencies select suitable maintenance and rehabilitation (M&R) treatments.

Participants are encouraged to bring photos of distresses in their network to class. Anyone without a basic understanding of asphalt pavement distresses is also encouraged to complete a 10-minute primer prior to class.

Roads Scholar Category - 2 Technical hours

VLR Virtual Technical Round Table

Municipal Roads General Permit & Road Erosion Inventory App Updates

This webinar will cover:

- How to download and use DEC’s MRGP REI applications such as Collector and Survey 123.
- How to re-assess road segments after segments have been upgraded to MRGP standards.
- How to view, interpret, and use your town’s REI data in the MRGP database portal.
- How to use mapping tools to assist in the implementation of road practices.

Roads Scholar Category - 1 Technical hour

VLR Pavement Surface Evaluation and Rating (PASER)

This course is intended to assist local officials in understanding and rating the surface condition of asphalt, concrete, sealcoat, and gravel pavements. It will describe types of defects and provides a simple system to visually rate pavement conditions. It also will present how to use the ratings to assist in planning and budgeting.

May 4 - VTrans Training Center
In-Person 8:00 a.m. - 12:00 p.m.

May 5 - Mendon VTrans Conference Room
In-Person 8:00 a.m. - 12:00 p.m.
The course will consist of both classroom lecture and practicing rating roads in the field.

Roads Scholar Category - 4 Technical hours

Rivers & Roads Tier I
This eLearning discusses river terms and concepts to provide a background for the Tier 2 class. The eLearning may take 30 minutes to an hour to review and includes some quick quizzes that are not recorded but provide immediate feedback for the user.

Roads Scholar Category - 1 Environmental hour

Rivers & Roads Tier II
Tier 2 is a two-day training and is both indoors and outdoor. Bring, or wear, appropriate field clothes and waterproof boots or old sneakers you can get wet! Each day will be indoors for slide shows, class exercises, river flume table demonstrations, and outdoors on rivers and streams to observe in the field what we’ve seen and discussed indoors.

Roads Scholar Category - 16 Environmental hours
Must attend both days to receive credit.

Rivers & RoadsTier III
Note: Tier I and Tier II Rivers and Roads trainings are a prerequisite to register for Tier III.

- This training is a one-day class.
- Participants are encouraged to review the "Vermont Standard River Management Principals and Practices version 1.3" prior to the trainings. http://dec.vermont.gov/watershed/rivers/river-management#principles
- There will be options for both in-person and remote participation. We encourage in-person participation, if possible, but we hope this will provide all who are interested a chance to join us. Links and information will be provided to participants as we get closer to each training date.

VTrans Training Center is hosting this workshop.

Roads Scholar Category - 6 Environmental hours per topic

TC3 (Transportation Curriculum Coordination Council)
Did you know that AASHTO has an agreement with the Federal Highway Administration (FHWA) to provide training to local agencies and tribes? The AASHTO TC3 has helped to develop hours of training in almost all highway areas from constructing a project to maintenance. In just a few clicks you can view information on plan reading, math, project inspection, and so much more. There are courses for everyone from new employees to managers, so whatever your position is, it's likely that TC3 has information for you. To find applicable trainings, search in the LMS 'TC3' or 'AASHTO', or by searching for a specific topic.

Construction Safety Awareness: Working Safely in Work Zones
It is easy to understand why construction workers and inspectors need safeguards for working on or near roadways. Roadwork often takes place during inclement weather, in low-lighting or poor-visibility
conditions, and in the presence of high-speed or congested traffic, construction vehicles, construction equipment, and other hazards. It is easy to understand why construction workers and inspectors need safeguards for working on or near roadways.

Upon completion of this course, participants will be able to:
- List safety risks at a construction site.
- Describe the three major types of injuries occurring in highway work zones.
- Explain the components of temporary traffic control zones.
- Describe the ANSI/ISEA 107-2015 types and classes of safety apparel.

Pavement Markings
Pavement markings are an often-overlooked component of the road construction process, but they serve a very important safety purpose. This course covers the various types of available pavement markings, including retroreflective beads, tape, paint, thermoplastic, resins, and markers. In this course, you will learn important information about those materials, their application, and the fundamentals of line markings. Nine modules comprise this course:
1. Introduction to Pavement Marking
2. Basics of Line Markings
3. Project Considerations
4. Retroreflective Glass Beads
5. Paint
6. Tape
7. Thermoplastics
8. Resins
9. Markers

If you are having issues with logging into the Learning Management System please email vermontlocalroads@vermont.gov or request your credentials here.

VLR Past Webinar Recordings

**NOW AVAILABLE:** Recordings of past VLR webinars are now available on our website. They are categorized by Roads Scholar category (Environmental, Equipment, Safety, Supervisory or Technical).

**Featured recording for this month is “Trench Safety”.**

Tailgate Talks

Vermont Local Roads in partnership with the Vermont Agency of Transportation (VTrans) is proud to announce the relaunch of “Tailgate Talks.” These are intended to be brief 10-15 minute presentations of information, exercises, and opportunities to review important workplace policies and procedures with staff members.

"To Review as a Group:" Use the PDF to the right, once reviewed as a group, please send a sign-in sheet of names to the VLR team. We will enter those names into the LMS to have the tailgate talks added to your transcript.
Search for "VLR Tailgate Talk" to watch recorded tailgate talks via the Learning Management System. We have Chainsaw Safety and Stress Management available.

News & Resources for Municipalities

In this section you will find news, resources, and sharing from other partners for municipalities.

2022 VERMONT MUNICIPAL EQUIPMENT SHOW & FIELD DAY

WHEN: May 11th, 2022
WHERE: Barre Municipal Civic Center - Barre, VT
SPONSORED BY: NEAPWA

After two years of the equipment show being canceled in Barre Vermont, it will be back May 11, 2022. This event is under new management with a slightly modified title: 2022 Vermont Municipal Equipment Show & Field Day sponsored by the New England Chapter APWA. We already have over 50 vendors making the commitment to attend this year in person, and we know they all are looking forward to seeing you there as well.

The registration form can be found on the VLR website under “Road Notes” or by clicking here.

Registration Deadline: April 15, 2022
Details are on the registration form.

Hope to see you all there!
