

Instructor

Rob Gentle - VTrans Safety & Health Instructor (VTTC)

Rob has been helping Municipal and State crews stay safe and compliant for over 22 years.

Does the thought of complying with OSHA's "Control of Hazardous Energy" Standard overwhelm you?

It does not have to be that way anymore. We will coach you over the three hurdles needed to finish this race, stay safe and compliant with "Lock-out/Tag-out."

- Know Your Equipment
- Know Your Isolation Points
- Know Your Procedures

About

This class is designed for the "Authorized Employee" at your facility.

This employee is trained and designated to use "Lock-out/Tag-out" procedures. An "Authorized" and "Affected" employee maybe the same, when the operator's duties include maintaining or servicing machinery or equipment which must be locked out &/or tagged out.

Experience has shown us that the best person/employee to attend this class is not the manager or supervisor.
