Vermont Local Roads Program | VTtrans Training Center | 1716 US Route 302 | Berlin, VT 05633-5002

Instructor

Todd Eaton - VT Local Roads Circuit Rider

Todd has nearly 20 years of experience in various disciplines of construction including 9+ years in heavy highway construction supervision, inspection, and design of maintenance projects and traffic safety plans.

About

This course will cover the basic concerns in roadway design, construction, and maintenance with practical information that Vermont towns can implement immediately. The course will include the basic elements of a well-constructed road, assessment of surface damage and causes, the importance of proper drainage, the necessity for compaction, and appropriate repair strategies.

Audience

Road Foreman
Road Crew
Select Board Members
Administrators
Town Managers

Learning Objectives:

- Discuss the elements of a well-constructed road
- Understand how water affects roadways from the surface and in the subgrade, and understand the effects of poor drainage
- Recognize common pavement damage and discuss their possible causes and appropriate repair strategies
- Understand the importance of proper construction inspection
