- Tuesday, August 27, 2019 - VTrans Training Center, 1716 US Route 302, Berlin, VT

Vermont Local Roads Program | VTrans Training Center | 1716 US Route 302 | Berlin, VT 05633-5001

Instructors

Carl Senecal - VTrans Training Center (VTTC)
Occupation Safety Technician

Carl has 30 years of experience in various disciplines of construction including 19 years working for VTRANS in District 7 where he started at entry level and then worked up to a supervisory position. He carries this experience with him to his new role as a Safety Specialist for the South East Region of VTRANS.

Todd Eaton - VT Local Roads Circuit Rider

Todd has nearly 20 years of experience in various disciplines of construction including 9+ years in heavy highway construction supervision, inspection, and design of maintenance projects and traffic safety plans. Safety inspection and compliance has always been his focus and expectation throughout Todd's career. He also holds several professional certifications including Northeast Transportation Technician Certification Program (NETTCP), American Traffic Safety Services Association (ATSSA), and Occupational Safety and Health Administration (OSHA).

About

This training will focus on teaching the necessary skills for arresting and restraining falls in the workplace.

You will learn how to identify possible fall situations, the proper use of engineered and other types of fall restraint strategies, the purpose and use of the Personal Fall Arrest System (PFAS), and the proper methods to inspect and maintain fall protection equipment.

Agenda

- Identify the OSHA Fall Protection Standard for Construction Industry (29 CFR 1926, Subpart M).
- Recognize Fall Hazards in order to avoid, abate, and prevent fall from ladders, roofs, scaffolds, and other potential situations.
- Understand some of the different types of fall protection systems available.
- Understand how to develop a Fall Protection Plan.

Audience

- Highway Foreman
- Highway Personnel
- Town Managers
