Presenters

Mike Everhart - Control & Geo-Product Specialist with E.J. Prescott

William Maier - Regional Sales Manager Roadway Products

William graduated from the United States Military Academy in 1981 with a bachelor's degree in engineering. Mr. Maier was honorably discharged from the United States Army in 1986 and has worked in the heavy construction marketplace for over 32 years as a business development specialist for construction products manufacturers such as Tremco, WR Grace, Contech, and now Tensar International. He has worked in the transportation market since 2009 as product manager for Tensar geogrid for roadway applications and now serves as the Northeast Regional Manager. William currently resides with his wife of 33 years in Medford, NJ.

About

This workshop will be a generic discussion about a wide range of fabrics, geogrids, drainage and environmental/ water quality products for use on, under and alongside gravel and paved roads.

Pavement Interlayer reinforcement products to reduce reflective cracking and to improve the performance of flexible pavement overlays will also be discussed.

Information about the proper application and installation of the various products as well as the benefits and successes of the products will be presented.
