Instructor

Todd Eaton - VT Local Roads Technical Assistance & Training Specialist

Todd has nearly 20 years of experience in various disciplines of construction including 9+ years in heavy highway construction supervision, inspection, and design of maintenance projects and traffic safety plans. Safety inspection and compliance has always been his focus and expectation throughout Todd's career. He also holds several professional certifications including Northeast Transportation Technician Certification Program (NETTCP), American Traffic Safety Services Association (ATSSA), and Occupational Safety and Health Administration (OSHA).

About

This workshop will give an overview of the basic concepts of survey and engage in practical exercises to gain a competency in basic job site set up and verification of constructed cross slope.

Audience

This training is targeted for those who are new to the construction surveying experience or for anyone needing a refresher on road crew responsibilities.

Maximum class size 15

Objectives

- Describe basic survey techniques
- Understand measurement and construction surveying
- List the instruments and techniques used in measurement
- Perform stationing and staking operations
- Perform basic survey mathematics
